

CANINE GOOD CITIZEN SILVER

We offer the Canine Good Citizen Silver Test as required and set out by the Kennel Union of Southern Africa.

Before the SILVER certificate is issued, all the following Tests must have been passed. Dogs may be tested singly or in groups.

Test 1 Play with dog

This is to demonstrate that the dog will play with handler. Play is an extra dimension to a dog's life and can be used to make training fun. When instructed to do so, the handler should commence to play with the dog. Play should be under the handler's control and if it involves articles that dog should readily give them up. Play should be appropriate to the dog under test, but should not include any fighting. Formal retrieves will not be deemed as appropriate play.

Note: It is recommended that the Evaluator commence with this test.

Test 2 Road work

This is to demonstrate that the dog has the ability to walk on lead, under control. This test should be carried out at a suitable outdoor location and an occasional tight lead will be acceptable. The handler and dog should walk along a pavement, execute a turn, and then stop at the curb, where the dog should remain steady and controlled. Having observed the Highway Code (dog sits while handler looks left, right and again left assuring it is safe to cross the road), they should proceed to the other side, turn and continue walking. Distractions are incorporated, such as normal passing traffic.

Note: Turns are only tests of ability to change direction.

Test 3 Rejoin handler

This is to demonstrate that the dog will remain steady when the handler leaves the dog, but the dog will rejoin handler when instructed to do so. Having left the dog and moved approximately ten (10) paces away, when directed to do so, the handler should call the dog. Having rejoined, the dog should stop close to the handler in any position, the lead shall be replaced.

Note: The dog should not rejoin until instructed, but minor anticipation will be acceptable.

Test 4 Stay in one place

This is to demonstrate that the dog will stay on the spot while the handler moves away. The handler should place the dog with the lead attached in any position of their choice. Upon instruction, having quietly dropped the lead, the handler will move a distance of five (5) paces away for a period of two (2) minutes.

Note: This is a test to see if the dog will stay in one place without changing position. Minor movements and slight changes of position are acceptable.

Test 5 Vehicle control

This is to demonstrate that the handler can get the dog in and out of a vehicle in a controlled manner. Without pulling, the dog should be taken on a lead towards a vehicle and remain steady whilst the handler opens the vehicle door. The dog should not attempt to get in until instructed to and should enter willingly. Thereafter, the door should be closed. The handler, Evaluator and, if necessary, a driver will get into the vehicle. The engine should be started and run for a short time to enable the Evaluator to assess the effect upon the dog, which at all time should remain quiet, relaxed and under control. The dog will then be instructed to exit in an orderly manner. The handler should then close the door and leave the vehicle with the dog calmly under control.

Note: Only dogs that are physically able should be invited to jump into the vehicle. Where appropriate, dogs may be lifted in and out of the vehicle.

Test 6 Come away from distractions

This is to demonstrate that the handler has control over the dog when there are distractions. The handler should take the dog on lead, to a gathering of people with dogs on lead. When instructed to do so, the lead should be removed and the handler should walk or run away calling the dog, which should return without delay and be placed on the lead.

Note: Dogs of an unruly nature should not take part in this test or be part of the group.

Test 7 Controlled greeting

This is to demonstrate the dog will not jump up at visitors etc. The Evaluator, or helper, will greet the dog as might be done when entering a house during this greeting, should the dog jump up, the handler must be able to make the dog cease doing so.

Note: The examiner should not entice the dog to jump; a dog that does not jump will pass. A dog showing poor temperament will not pass.

Test 8 Food manners

This is to demonstrate that the dog has good manners when aware of peoples' food. Food should be handled or consumed while the dog, on a loose lead, is taken in close proximity to it. The dog should not unduly respond to the temptation (i.e. not beg for food or steal).

Note: The Evaluator should be satisfied that the dog has been taken close enough to the food to be aware of it.

Test 9 Examination of the dog

This is to demonstrate that the dog will allow inspection by a stranger as might be undertaken by a veterinary surgeon. The dog on lead will be required to be placed for inspection of mouth, throat, eyes, ears and feet when standing, sitting or lying down as required. Other than mild avoidance the dog should allow inspection without concern.

Note: It is the responsibility of the training officials/evaluator to ensure that only suitable dogs take this test. A table may be used for those dogs which are customarily examined on a table.

Test 10 Care and responsibility

This is to demonstrate that the handler has a good understanding of the responsibility required to care for their dog and the responsibility with regards to their neighbors and community. The handler will be asked questions by the evaluator from Section 1 of the no-scheduled document titled "[Care & Responsibility](#)". The questions should not be phrased in an ambiguous manner and where necessary, examiners should rephrase the same question in an attempt to bring out the correct answer from the handler.

Note: The handler should be able to give six (6) out of ten (10) correct answers from the Care and Responsibility Document Section 1.

CANINE GOOD CITIZEN SILVER CARE & RESPONSIBILITY

We offer the Canine Good Citizen Silver Test as required and set out by the Kennel Union of Southern Africa.

The object is to test the knowledge of the handler on the subject of his responsibility and care of his canine companion.

When the Evaluator is questioning the handler from the KUSA Code of Ethics or the Care and Responsibility document, the questions should not be phrased in an ambiguous manner and, where

necessary the Evaluators should rephrase the question in an attempt to bring out the correct answer from the handler.

Note: Only one numbered item may constitute a question.

The handler should be able to give six (6) out of ten (10) correct answers.

CARE AND RESPONSIBILITY – SECTION 1

1. A dog's rights

A dog owner should be aware of a dog's needs and rights and they are:

- 1.1. **Water** – a dog needs a constant supply of clean drinking water.
- 1.2. **Food** – one or two meals a day are suitable for most dogs.
- 1.3. **Shade** – a dog needs a shady place it can retire to in the heat of the day.
- 1.4. **Exercise** – all dogs need exercise and where possible they should be taken to places they can safely run free.
- 1.5. **The pack** – all dogs need to be able to feel part of the pack.
- 1.6. **Leadership** – a dog knows there will be leaders within the pack. Leaders should not include the dog.
- 1.7. **Company and affection** – dogs need company and affection without being excessive.

2. Illness

A dog should display the same demeanor from day to day. Should any of the following occur, you should immediately seek veterinary advice:

- 2.1. A dog with a normally healthy appetite refuses to eat.
- 2.2. A normally active dog becomes lethargic.
- 2.3. A dog continuously vomits.
- 2.4. Its motions/stools are very loose, or worse it has diarrhea.
- 2.5. There is a loss of blood.
- 2.6. A dog does not want to get up.
- 2.7. The dog is unconscious.
- 2.8. A dog is having a fit or seizure.

3. Responsibility of ownership

- 3.1. Register your dog with a veterinary practice.
- 3.2. Feed the dog regularly with nutritionally balanced diet.
- 3.3. Do not feed the dog from your plate or at the table, but from the dog's own bowl.

- 3.4. Dogs like a bed of their own, so provide one.
- 3.5. Rub your hands over the dog's body to check for sticky jacks, ticks or lumps and bumps.
- 3.6. Regularly clean and groom your dog, ensuring that no part of the dog's coat becomes matted.
- 3.7. Bathing is sometimes necessary, but it destroys the natural oils of the dog's coat and should be done in moderation.
- 3.8. Do not allow dogs to become a nuisance to others. Ensure control is maintained at all times.
- 3.9. Where there are other animals; such as horses, sheep or cattle keep your dog on lead.
- 3.10. Your dog should be kept in a securely fenced garden and not allowed out on its own.
- 3.11. Do not allow your dog to foul at inappropriate places.
- 3.12. If fouling does occur in a public place, always carry a bag to clean up after your dog.
- 3.13. Remember a barking dog may be a nuisance to others.
- 3.14. Never take your dog into a restaurant or a shop that sells food.
- 3.15. Do not leave your dog unattended if you stay away from home or go on holiday.
- 3.16. The person looking after your dog should know your vet's phone number.
- 3.17. Discuss neutering and spaying with your veterinary surgeon before your dog is six (6) months old to avoid unplanned litters.
- 3.18. If you want your bitch to have puppies, seek the advice of your veterinary surgeon and breeder.
- 3.19. Always ensure that your dog is wearing a collar with an identification tag. Never leave a dog unattended with a choke type collar.
- 3.20. Remember that not everyone is a dog lover and they may dislike even a friendly approach from your dog.

Note: The above is intended as a guide only and should not be considered as an exhaustive list of dog owner's responsibilities.

4. Other responsibilities

- 4.1. **Socialization** – As soon as the puppy is covered by early vaccinations it should be gradually socialized with strange dogs, people and children and familiarized with traffic. Not doing so can cause apprehension. Withdrawing a dog from something that frightens it will only make the apprehension worse in the long run. Never make eye contact with an unfamiliar dog. All socialization should be carried out in a careful manner.
- 4.2. **More than one dog** – If someone owns more than one dog, they should not attempt to train two or more together. It has to be remembered that, not only will it distract the other dog, but when one is admonished, or praised, this will also apply to the other and will be confusing. Always train on a one on one basis with the other dog out of the way. When both dogs are well behaved, they may be handled together.
- 4.3. **Dogs off lead** – No matter how well trained or under control a dog might be, it should never be walked off lead in environmentally unsuitable areas or those that do not permit dogs off lead.
- 4.4. **Equipment** – A dog's lead should be totally secure and attention should be paid to worn stitching or a clip that may not be reliable. There are many types of collars available and

handlers should ensure that the one they choose to use is in a good condition and will not break under strain. Also it should always be adjusted so that, in event of panic, it would be impossible for the dog to slip free.

4.5. Babies, children and dogs – When the family has a baby it is natural that much attention will be given to the new arrival. It is therefore important that the dog does not become jealous. Owners must ensure that the dog continues to receive the same love and affection as before.

5. Children

Children are usually less predictable than adults and they should be warned:

- 5.1. Never to make sudden movements close to a dog.
- 5.2. Never to scream or suddenly yell close to a dog.
- 5.3. Never to lunge at a dog, particularly if the dog is asleep.
- 5.4. Never put their face in a dog's face.
- 5.5. Never eat food close to a family dog.
- 5.6. Never tease or pull at a dog's body, ears, tail or coat.
- 5.7. Never ignore a dog's warning growl.
- 5.8. Never interfere when a dog is eating.
- 5.9. Always wash their hands after playing with a dog.
- 5.10. Always ask permission before touching a dog they don't know.

Note: Children should be reminded to respect all dogs.

6. Barking

Excessive barking at home can become a nuisance and the way the dog is kept at home may inadvertently encourage the problem.

- 6.1. **Territorial reasons** – Dogs barking for territorial reasons might do so at the front door or window where they can see people or dogs approaching. In the garden they may do so at the gate or fence. Excluding them from such areas helps to reduce the habit factor.
- 6.2. **Predatory or chase instincts** – allowing a dog to constantly indulge in this habit in the garden will exacerbate this problem.
- 6.3. **Reasons of insecurity** – Constant company and excessive reassurance and touching given to an insecure dog may cause stress when left without the company of people. The result may be barking, whining and howling.
- 6.4. **At night** – If it is necessary to vocally command a noisy dog at night, it should be done at a distance. Thus avoids the dog learning how to call its owner back.

7. Dogs and stationary vehicles

7.1. Ventilation for a dog in the car - Dogs must always be given ample ventilation when left alone in a vehicle. However, during hot weather even windows left wide open and/or shaded may not give sufficient ventilation. In such conditions dogs should never be left alone in vehicles.

7.2. Approaches to a vehicle from strangers – Most dogs are territorial when in their vehicle and may become aggressive if strangers put part of their body through a window or door. Therefore this should always be prevented.

8. Vehicle travel

8.1. The psychology of vehicle travel with dogs or puppies

8.1.1. Dogs should gradually be accustomed to vehicle travel by taking the dog out in the vehicle for short training journeys.

8.1.2. Dogs learn to enjoy vehicle travel if they are often taken by vehicle to a place where they have a pleasurable experience.

8.1.3. Dogs learn to dislike vehicle travel if they are only taken by vehicle to places where they have an unpleasant experience.

8.1.4. How a dog behaves in a vehicle on the first few journeys will form its habits of the future.

8.2. When travelling in a vehicle a dog:

8.2.1. Should never be transported on an open bakkie.

8.2.2. Should not be constantly moving around.

8.2.3. Should not be a distraction to the driver, and never be allowed on the driver's lap when the vehicle is in motion.

8.2.4. Should be secure so that, in the event of an accident, injury to canine and human passengers is minimized.

8.2.5. Should not travel with head out of the window, a dog can be blinded by an insect.

8.3. When entering and alighting a vehicle a dog:

8.3.1. Should be on lead in traffic areas.

8.3.2. Should do so in a controlled manner

8.3.3. Should not be a nuisance to others.
